

We have successfully completed packing flu toolkits for all elementary and middle schools. Each kit contains face masks, two digital thermometers, one box of 100 probe covers (for the thermometers), strip-style thermometers for each school with a DLC classroom and enough germicidal wipes and hand sanitizer foam for approximately each classroom in their building. Instructions for use and reorder information was also included.

High school kits will be packed and delivered as soon as the Warehouse receives our next shipment of supplies.

I'd like to thank Ruth Gelbrich, Vonnie Good, Pat Cody, Mary Cadez, John Smith, Kathy Patterson, Lynn Lanham, Gene Bloom and Jay Remy for their hard work and guidance in getting our district flu-ready. The Warehouse staff need to be acknowledged for creating such a wonderful work space for us. Bev Gookin, Kathy Swancutt, Nicole Gill, Gina Sadorra and Pat Cody packed and labeled boxes with me. What a team!
